SBA and Quarter/Interim Testing Next Week!

Our school will be doing SBA testing on March 6th for all Juniors. End of quarter Interim testing will be administered March 7th and March 8th. Please see testing schedule for specific days that your child will be testing. Please support your students and our teachers during this testing.

Adam Benavidez
Principal

**Quarter Ends
Friday**

Mr. Lujan's science classes are gearing up for the students 9 weeks test. The test is worth 20% of the grade so ensure that your students are studying over the next few weeks. This week we will finish our units and then early next week will be used to review all the concepts learned thus far. These review will serve the students well and give them the best opportunity to pass the 9 weeks exam. Just a reminder, here at CYB 9 weeks equals a semester so if your student passes the 9 weeks they receive the semester credit. Thank you and good luck to your student on their exams. Mr. Lujan

Testing Schedule
11th Grade SBA March 6th with make-ups on March 12th.
March 7th Quarter/Interim Assessments in 1st, 3rd , and 5th
March 8th Quarter/Interim Assessments in 2nd and 4th

In the math department, Ms. Padilla has accepted a job in her engineering career field. We are sad to see her go and wish her the best of luck in her profession. To ensure our students receive the required math content, they will be placed in Edgenuity for their math class during quarter 4. We found success with this model during the 2nd quarter when we found ourselves in a similar situation. Irene Gallegos has been hired to assist students during their math classes. Mrs. Gallegos is an experienced sub. With structure and motivation, we are confident our students will once again persevere in Edgenuity for math.

Hello Everyone!

We are coming to the end of 3rd quarter! English II will finish their essay on the main theme in the book they chose to read. English I, IV will be reviewing what they've learned through stations and posters I've created. English III will be finishing their argumentative paper on the 3 articles they read about whether or not smart phones are making us dumb. Keep up the good work! Thank you, Ms. Welfelt

Hello Parents and Students,

The students are knocking through the history books with lots of knowledge and power. In U.S. and World history we are currently going through WWII and the Cold War and how it truly changed our history today. In Government we are discussing Immigration as well as the Federal Government on how these both affect each and everyone of us. In NM history we have completed the entire book which we will be taking these last few days in studying for the final test. The students are a joy to have and are bringing even more history to remember for them at C.Y.B..

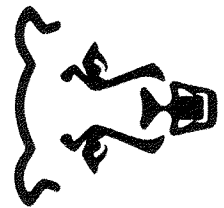

Thank you, Mrs. Daniels

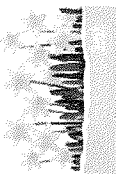

Intro To Automotive
This last month the students have completed lessons about "How to Use Tools/Equipment", "Care and Cleaning", also have completed chapters on checking fluid levels. Most students are completing tasks and have gained knowledge on automotive repairs and upkeep. It is my goal to teach this class as full semester. I believe that it is important to instill basic knowledge in all aspects of basic automotive repairs.
Mediation
Students have learned different ways to resolve conflict resolution in school, at home or work. Students have had to learn to work together to solve various scenarios, by doing so they have grown closer as a class and as a whole. It is a joy to watch students come up with their own solutions to many different scenarios. The final for this class will be project based where students will have to create a Peer Mediation Program.
Thank you,
Mrs. Alexander
